

**You Can't  
Afford  
NOT to  
Have One!**

**CUTRITE™**

The Cutrite is a circular saw guide that makes cutting wood I-Joists quick and easy. It assures that every cut is straight, square, fast and accurate.

The Cutrite can be used to cut both 9 1/2 inch and 11 7/8 inch joists.

Just measure, mark the cut line, put the tool in the web, line it up with the mark and cut.

The tool supports the saw through the cut and also reduces the chance of binding.

- ACCURATE
- CONVENIENT
- INEXPENSIVE
- DURABLE
